

4 Spread your wings

There's nothing like birdsong to evoke sunny days and outdoor living in an instant. It couldn't be easier to string up a pretty birdhouse from a tree branch or wall hook, and there are plenty of beautiful options around. We love these 'Egg' designs (£88; thebestdressedgarden.co.uk), or try ooms.nl for the innovative solar-panelled creation shown far left. Sunlight charges a battery which lights up a transparent stick at night, attracting insects – the perfect snack for your resident bird! ►
